

Assembly Instructions

Portable Free-Standing Sports Cage™

SAVE THESE INSTRUCTIONS

WARNING

- Adult supervision is required for set-up and use of this cage. Follow Assembly Instructions.
- Nylon netting will fray, tear or break from normal use or abuse.
- For golf use, hit balls only into the golf-mesh end of net.

BEFORE EACH USE:

- Thoroughly inspect the cage netting for any holes or signs of wear.
- Be sure that all frame tubing is undamaged and properly assembled on a level surface.
- The netting is designed to deflect when it is impacted by balls or other objects. Therefore, be sure that bystanders, other waiting participants, and any structures or vehicles are no nearer than 8 feet from the outer sides of the cage when it is set up and in use.
- Be sure only one participant at a time uses the cage.
- Be sure the player's position is in line with, and in the center of, the cage opening.
- To avoid injuries or accidents, dismantle and store your JUGS Portable Free-Standing Sports Cage when wind velocities are anticipated to be greater than 15 mph. See warranty information.

Assembly Instructions

Remove the frame sections and netting from your carrying bag and separate them. Then follow these easy steps.

Parts Inventory

QTY.	DESCRIPTION
1	 batting cage net
4	 carrying bags
4	 long-cable assemblies with hooks
2	 short-cable assemblies
12	 3-way fittings
4	 4-way fittings
44	 close-up view of JUGS <i>QUICK-SNAP</i> 3-ft. tubes
22	 6-ft. bungied tubes
8	 foot tubes
8	 ground-anchor loop

IMPORTANT: When using your JUGS Portable Free-Standing Sports Cage outdoors, you must stake it down with the ground-anchor loops.

The JUGS Portable Free-Standing Sports Cage frame is guaranteed for five (5) years, and JUGS Portable Free-Standing Sports Cage netting is guaranteed for one (1) year, against defects in material or workmanship, unless damaged by misuse, negligence, or accident—or exposed to extremes of weather such as snow, ice, high winds, or other acts of God.

Important Warranty Note:

For ease during set-up and dismantling, your JUGS Portable Free-Standing Sports Cage is manufactured from light-weight materials. However, like all outdoor structures, it is subject to loads imposed upon it by wind, snow, and ice. It is not designed to resist wind velocities in excess of a moderate breeze. In order to prevent wind damage, dismantle and store your cage indoors whenever wind velocities for your area are anticipated to be in excess of 15 miles per hour. Never leave your cage setup outside during snow or freezing rain storms. Failure to comply with the above will void your warranty.

Quick-Snap® Basics

When erecting the Sports Cage, connect the two sections of bungied tubes together, as shown below.

Twist them to align the lock button with the lock hole, as shown below.

Depress the lock button and slide the two sections of tubing together. Be sure the lock button springs back securely inside the lock hole.

Step 1 — Erecting the Roof Frame

Identify, and set aside for later installation, the four six-foot bungied tubes with the warning labels affixed.

Insert the wider end of a 3-foot tube into a 3-way fitting. Next, insert the narrow end into a 6-foot bungied tube, as shown below.

Insert another 3-foot tube into the other end of the 6-foot bungied tube. You will now have a 12-foot length of tubing, as shown below.

Repeat this process three times, and assemble the resulting four 12-foot lengths into a square. The roof frame is now complete.

Step 2 — Erecting the Wall Frame

Insert another 3-foot tube into one of the 3-way fittings in your square, as shown below.

Repeat this process until all four 3-foot tubes are attached as shown below.

Step3 — Erecting the Corner Posts with six foot bungied tubes

Using a 6-foot bungied tube with the warning label affixed, connect it to one of the 3-foot support tubes as shown below. (BE SURE THE WARNING LABELS ARE RIGHT-SIDE UP.)

Repeat this process until all four corners of your frame have a 6-foot bungied tube attached as shown.

Step 4 — Erecting the Corner Posts to Nine Feet High:

Snap together the 6-foot bungied tube, as shown below.

Repeat this process until all four corners of your frame have a 6-foot bungied tube. The corner posts are now nine feet high.

Step 5 — Erecting the Corner Posts to Twelve Feet High:

Connect the four remaining 3-foot tubes to the 9-foot corner post tubes to make the frame twelve feet high.

Step 6 — Assembling the Base Frame:

Using the remaining tubes and fittings, lay out the base frame and assemble it, as shown below.

Move the base frame under the corner posts. For best results, we recommend one person at each corner of the base frame. Then connect the corner post tubes to the fittings in the base frame.

Attach a foot tube to each outside fitting in the base frame, as shown below.

Step 7 — For Outdoor Use:

Put the ground-anchor loops into the ground so that they completely engage the foot tubes, as shown in the photo below.

IMPORTANT: When using your JUGS Portable Free-Standing Sports Cage outdoors, you must stake it down with the ground-anchor loops.

Step 8 — Hanging Net at Ends

Before hanging your net on the JUGS Sports Cage frames, make sure the inside front-corner posts are 31 feet apart.

Spread the netting out, inside the frames, as shown in the photos below.

Important Note: The golf-netting side must be hung first.

First tie the rope to the middle of the back crossbar.

Then tie the corners of the net to the back corners of the frame as shown below.

Important Note: Go to the opposite end of the Sports Cage and repeat the process of tying the net to the frame.

Your cage should now look like this.

Step 9 — Attaching Net to Cage with Cable Assemblies

Using the long-cable assembly with the hook, attach the top sides of the net to both frames as shown below.

Move inside the cage, and attach the netting to the center of the crossbar, using the short-cable assembly as shown below.

Below is a finished view of the fully erected JUGS Portable Free-Standing Sports Cage.
